THE WAHL-EVERSHARP WRITING EQUIPMENT LINE—AND THE WAHL-EVERSHARP DEALER

THE WORLD progresses. Man and the products of his handiwork develop and improve. Each year some product is discarded which was believed to be the ultimate development in its line, and something new takes its place. Thus it is that manufacturers who would keep pace with the public desire must be constantly on the alert to improve their products, to add new products from time to time, and to withdraw those which have outlived their usefulness.

Progress has always been the keynote of Wahl success. Its very beginning in the writing equipment field was in the development of a product so new, and presented to the public in so novel a way, that it immediately opened up tremendous new sources of profit for dealers in all parts of the world. To maintain that progressiveness in development has been the constant aim of The Wahl Company.

Yet changes develop slowly. From an idea to the finished product is usually a tedious process of many months' duration—a long period of experiment and test. And most important of all, the effect on dealers must be carefully considered, and plans made to assure the protection of their investment in Wahl Products.

It is gratifying to note the remarkable success of the new Perfected Eversharp. It is gratifying to note the tremendous strides made by the precious metal pen, a new product produced and pioneered by Wahl. Finding its first market as a gift item because of its high jewelry value, it is now coming into its own as a fountain pen because of its practical, exclusive features—its slender grace, its perfect balance, its indestructibility, its greater ink capacity without the curse of bulkiness.

Last year we presented another new departure in mechanical pencil making—a pencil with a thick writing lead. With our usual liberal advertising backing, it is rapidly winning favor with the public,

and providing another new market for Wahl dealers. This new thickness of lead (.075" diameter in comparison with the .046" diameter of the standard thin lead) gives the Eversharp line a complete range of lead sizes for every writing need. The standard thin lead is for continuous writing, the thick lead is a combination writing, manifolded, and marking lead, and the checking lead is for heavy marking use.

Noteworthy among other additions to the Wahl line have been the oversize, rubber barrel pencils, made for both thin and thick writing leads. The immediate demand for these pencils exceeded every expectation, to the extent that for a number of months our factory was severely taxed to fill orders.

With all the attention given to the development of new and improved products, The Wahl Company has realized that in the dealer's interest the most pressing need is for simplification, and important steps are being taken in this direction. These changes must come slowly, of course, in order that the dealer's investment may be completely protected, but when they are finally accomplished, the problem of stocking the complete Wahl line, and thereby earning the many benefits that accrue, will be a far simpler one for the average dealer.

o o o

EVERY product sold by The Wahl Company carries the Wahl Guarantee, so sweeping as to be virtually unconditional, yet so simple that there is no opportunity for misunderstanding or misinterpretation. It is not a sensationally worded statement, tending to confuse the public and make difficulties for the dealer, but a simple, direct agreement to protect the dealer in assuring the satisfactory performance of every piece of Wahl merchandise sold. The best assurance to you of its effectiveness is the sincere manner in which it has been carried out over a period of years. Briefly, the Wahl Guarantee is this:

We stand squarely behind the Wahl dealer in every sale of Wahl merchandise. We will make good with the dealer in any way that he finds it necessary to make good with his customers

THE WAHL COMPANY

WHERE WAHL-EVERSHARP PENS AND PENCILS ARE MADE

PICTURES and words can but poorly describe the Wahl factory, or the skill and care of manufacture that go into all Wahl Products. The large, daylight factory pictured above is far more than brick and stone and concrete—it is the home of an efficient, painstaking and highly-trained organization that takes pure gold and crude rubber and many other raw materials, and fashions them into the world's finest writing instruments, Eversharp and Wahl Pen.

The Wahl factory is a modern, fireproof building, five stories high, with seven acres of floor space. It is a building designed expressly to house this great pen and pencil making organization, and equipped for that purpose alone. The first four floors are occupied by the manufacturing departments, and the top floor by the executive, sales and general offices.

The equipment throughout is the finest that human ingenuity has devised for the making of quality writing instruments. Many of the intricate machines in regular operation here

have been planned and built by our own engineering staff, to provide equipment that would make better products, or make them more economically.

Practically every part of every Wahl Product is made here from raw material. Wahl makes its own precious metal tubing, its own rubber tubing, its own nibs, and the many other parts which make up a pen or pencil. Nothing is left to the whim of outside manufacturers, and thus The Wahl Company is able to guarantee unconditionally every piece of material that goes into a Wahl Pen or an Eversharp Pencil.

All Red Top Eversharp Leads, too, are made here from the best raw materials that can be procured in the United States and in other parts of the world. They are made accurately to fit Eversharp Pencils, of uniform strength, grade and diameter, in one of the finest lead factories to be found anywhere.

So many figures might be cited to show the capabilities and magnitude of this organization that they would only confuse. You will be interested to know, however, that the factory pictured on the preceding page has a daily capacity of 50,000 pencils, 8,000 pens, and 1,300,000 sticks of lead.

We might take you, with a word picture, through the great Wahl factory. We might show you how pure gold is alloyed to give it wearing quality, and the intricate processes by which it is transformed into smooth-writing nibs, and into the precious metal tubing which later becomes pen and pencil barrels. We might show you the bales of crude rubber stock and the many processes by which this rubber is purified and ultimately made into the tubing which gives the great strength and beauty to Wahl rubber pens.

We might tell of these and dozens of other interesting and novel operations; but after all, the things that go into a pencil or pen and the technical processes of manufacture are not so important as the art with which they are manufactured to give pleasing effects in design, perfect results in use, and lasting value in wear.

This precise and experienced manufacture has been the especial province of The Wahl Company through all the years of its being. A perfect understanding of materials, a genius for invention in its particular field, skilled men and special equipment, all are joined under the Wahl ideal of finest quality, to produce in Eversharp and Wahl Pen companion writing instruments without a superior anywhere or in any respect.

The eye is appreciative of their outward beauty, but to the creative mind, eased of concern with the manual effort, and to the responsive hand, equipped with a fluent and fatigueless tool, must be left the final verdict on the goodness of these writing servants. Wahl dealers know what this verdict is—know it by the multitude of expressions volunteered from the millions of men and women who have preferred Eversharps and Wahl Pens above all others.

SUPERIOR FEATURES OF PERFECTED
EVERSHARP PENCILS

1

1
THE RIFLED TIP

This patented feature, used only in Eversharp, first made a good mechanical pencil possible. Tiny relief spaces between the lead-gripping teeth prevent clogging or jamming. Still the lead is held firmly at the point; no slipping; no wobbling. Identify the genuine Eversharp by the grooves cut in the lead as it passes through the tip.

2

2
LOADS IN AN INSTANT

Above and at the right is shown the trigger which releases plunger when lead is used up. This automatic release makes Eversharp the fastest loading pencil. One pull—insert lead—one push—a turn. That's all.

3

3
EXTRA LEADS ACCESSIBLE IMMEDIATELY

The side-opening lead magazine enables the user to draw a new lead almost instantly. The amount of reserve lead can always be seen. This feature provides extra convenience and speed of operation. Because of the length of barrel necessary for this feature, it is found only in the long model pencils.

4

4
AUTOMATIC LEAD INDEX

To know the length of lead in Eversharp just pull the cap straight out. The distance between A and B, as shown in the illustration, equals the length of lead remaining in feed chamber ready for use.

5

5
SAFETY POCKET CLIP

The pocket clip on Eversharp is made stronger by a reinforced rib construction which adds to its appearance. The large point of contact eliminates wear on the clothing. Even if the clip is broken accidentally, a new one can be inserted in a few moments.

5

6
REPLACEABLE ERASER

The construction of Eversharp permits the eraser to be replaced by a new one. It cannot come out in use, yet it can be changed in a moment.

6

ALL PARTS INTERCHANGEABLE

Any standard Eversharp can be completely taken apart by unscrewing the tip and pulling out the mechanism. All parts are interchangeable and replaceable. Anyone can replace, in a few seconds, any part that becomes broken or worn through accident or abuse.

THE WAHL-EVERSHARP PEN OF PRECIOUS METAL

*A New Landmark in
Fountain Pen Progress*

ALONG the highway of fountain pen progress are but a few landmarks denoting basic developments in design that have guided the manufacturing effort of the future. The self-filling pen was one of these.

The self-filling pen, however, required a soft rubber ink sac which occupied a large part of the hard rubber barrel, and thus left little space for ink. Because the tradition of long years demanded that the barrel be made of hard rubber, the next step was simply to increase the size of the pen to get a larger space for the ink sac.

Thus resulted the bulky pens that have been the vogue for several years. But this method of getting greater ink capacity was a makeshift, as Wahl craftsmen realized. Why, they asked themselves, need the barrel be built of rubber at all, since the ink is contained in a soft rubber sac? Why not build the barrel of a thin, strong material which would give greater ink capacity, plus added strength, without the disadvantage of cumbersome size and weight?

The answers to these questions resulted in the development of the Wahl Precious Metal Pen—a pen which we believe is destined to set up a new landmark on the highway of fountain pen progress. Gold and silver were the materials chosen to carry out this revolutionary conception of a fountain pen. New as these metals were to the art of fountain pen manufacture, they had been for many centuries the only accepted materials for the making of other high-class articles of personal equipment. Since the beginning of civilization, they have been the only metals discovered (except for a few of prohibitive cost) that in their native state will maintain their outward beauty as long as any part of the material lasts.

So it was but natural that they were selected as the basic materials for The New Wahl Pen. This pen is so strong as to be practically unbreakable; it is slender and graceful, yet its ink capacity is greater than that of rubber pens twice its size; it is light in weight, perfectly balanced, unfaltering in writing performance, and has the rich beauty which can come only from fine jewelry designs engraved in gold or silver.

Some of the features are shown in the sectional view at the left. Note the thin walls, the rolled metal threads which cannot be broken, the large ink sac, the compact filling mechanism. Then turn to the pages which follow and note the beautiful jewelry designs and the graceful proportions of these pens.

Try a Wahl Pen from your stock; observe its fine balance, its light weight, and its certain performance. Compare its ink capacity, if you care to, with the largest pen in your case, and prove that it holds more ink than any other.

Wahl builds rubber pens, too, for those people who are not yet converted to this modern pen. These rubber pens are the finest that can be made, and second only to the pen of the future—the Wahl Precious Metal Pen.

WAHL-EVERSHARP Fountain Pen Desk Sets

THE Wahl Fountain Pen Desk Set idea has taken hold of the public in a big way. For the person who desires a convenient pen for the home or office desk, the Wahl Desk Set is the ideal pen to buy, and the Wahl line offers a variety of sets such as can be had in no other line and which will satisfy all tastes and needs.

Wahl Desk Sets embody many exclusive features which make them desired above other desk sets. The humidor cap in which the pen fits, is scientifically designed to keep the pen point moist so that it is ready to write the instant it touches paper, even though it has been unused for several days. It is so shaped on the inside that no ink from the pen point can be deposited on the inside of the cap and from there get on the barrel of the pen and soil the fingers.

The cap is attached to the base by a small ball and socket joint—so small and neat as to be scarcely noticeable—and yet so ingenious that the pen can be moved to any position with a slight touch. The pen will stay in any position in which it is placed. If the pen is struck it will not be broken nor will the set be knocked off the desk.

One of the outstanding features that make the Wahl Desk Sets the first choice of discriminating persons is their outstanding beauty. Beautifully tapered pens, attractively ornamented, are mounted on the most beautiful bases obtainable. The black and gold Portoro Marble is imported from Italy—being quarried only on the Isle of Palmaria and at Portovenere, both near Spezia. Pedrara Onyx is quarried in the peninsula of Lower California, three hundred miles south of the Mexican border. The Wahl Company takes the entire output of the best grade—the most beautifully marked onyx—for desk set bases. The new Argentine Onyx is imported from South America—it is quarried in Argentine Republic and Brazil. The finer grade used for Wahl Desk Set bases is expensive because of the limited supply and remote source.

Pens on Wahl Desk Sets will *not* lie flat. Any fountain pen that is permitted to lie flat for any length of time is liable to leak and deposit ink on the inside of the cap. Wahl Desk Set pens will drop to an angle of ten degrees, which is low enough to allow the pen to be placed in an ordinary desk drawer, if desired.

WAHL-EVERSHARP Desk Fountain Pens

Wahl Desk Pens are the finest that experienced craftsmen and perfected equipment can produce. They are made complete in our own factory. They have all the superior features found in other Wahl Pens and are famous for their excellent writing qualities.

Wahl Desk Fountain Pens can be ordered separately from the bases. When ordered by the following numbers the complete assembly including pen, humidor cap, and swivel will be sent. If pen only (excluding humidor and swivel) is wanted, add suffix "1" to any of the following symbol numbers. If pen and humidor (excluding swivel) are wanted, add suffix "3" to any of the following symbol numbers.

WAHL-EVERSHARP Desk Set Pencils

To match the Wahl Desk Pens, we have created a new Eversharp with a tapered end and with three narrow gold bands the same as on the desk pens. These pencils have a fine balance and feel, and make a very fine addition to any desk equipment. They contain all the superior Eversharp features and standard mechanism.

WAHL Emeraldite Desk Set Lamps

Standard Emeraldite Lamps can be fitted with Wahl Desk Sets in place of glass ink wells and make most attractive and practical desk fixtures that do double duty.

In ordering, both the symbol number of the lamp and the symbol number of the desk set must be given.

The lamp illustrated above is Emeraldite Lamp No. 8734E, finished in statuary bronze; height 18", base 7"x7½"; fitted with two Pedrara Onyx bases; 2½" square, mounted with DP767 Rosewood pens. In ordering, specify:

1—8734E (Code SMOLK) Emeraldite Lamp
\$14.50

2—25NX6 (Code SMIVS) @ \$12.00
\$24.00

Established retail price \$35.00
(On Pacific Coast \$40.00)

Can also be had with two Portoro Marble bases with DP760 black pens.

1—8734E (Code SMOLK) Emeraldite Lamp
\$14.50

2—25M6 (Code SMIRN) @ \$12.00 \$24.00

Established retail price \$35.00
(On Pacific Coast \$40.00)

The lamp illustrated above is Emeraldite Lamp No. 8734½E, finished in statuary bronze; height 18", base 7"x7½", fitted with one Portoro Marble base, 2½" square, mounted with DP760 black pen.

In ordering specify:

1—8734½E (Code SMOHG) Emeraldite Lamp
\$14.50

1—25M6 (Code SMIRN)
\$12.00

Established retail price \$25.00
(On Pacific Coast \$30.00)

If Onyx base is desired, specify:

1—8734½E (Code SMOHG) Emeraldite Lamp
\$14.50

1—25NX6 (Code SMIVS)
\$12.00

If extra fittings are desired, order:

No. LF1 (Code SMOFD) \$0.50
Established retail price \$25.00
(On Pacific Coast \$30.00)

THE NEW WAHL-EVERSHPARP \$5 PEN AND PENCIL TO MATCH

This new line of Wahl Pens and Eversharp pencils has been scientifically designed to meet the latest trends of public demand. These pens and pencils are easily sold because they are the biggest values to be found today—values that are outstanding and are readily seen and recognized.

WAHL-EVERSHPARP PENS

The outstanding features of these new Wahl Pens are:

Price—Seventy-two per cent of the money now being spent for fountain pens, is spent for pens retailing at \$5.00 and less. Therefore, our price of \$5.00 on a pen of such great value is helping to “step up” the price of fountain pens to the maximum that the great majority of pen users will pay, likewise increasing dealer profits.

Size—Thorough investigation indicates that a pen of .505 diameter (approximately one-half inch) will fit more hands and be more often preferred to other diameters. That is the size we have made this new \$5.00 pen. It is big in appearance, but not too big for comfort. It is the largest standard make of pen retailing for \$5.00 on the market today.

Color—People are “eye-minded”. They like what pleases the eye. For that reason we have made this new \$5.00 pen in the seven colors that have been found to be most popular. Dealers with the Wahl line can satisfy every customer because “Wahl makes them all.”

Style—There are three styles of pens that will satisfy all needs and desires—long, with clip for men; short, with ring for ladies; and short, with clip cap.

Construction—These new pens are of the best quality Wahl workmanship throughout. They have unbreakable barrels which are attractively ornamented. They have the largest ink capacity. They are free-flowing and have the self-starting Wahl comb feed.

Nibs—These pens are equipped, at no extra charge, with the famous Wahl signature nibs, a nib that is sturdy yet flexible enough to start writing instantly and maintain a continuous flow. These nibs are standard unless otherwise specified. There are thirteen other styles of nibs, from the finest flexible, to the broadest “stick ‘em in the floor” manifold, that can be had when specified.

Guarantee—These pens and pencils are backed by a broad, unconditional guarantee, equal or superior to the guarantee of any other pen, regardless of price.

NEW EVERSHARPS

Eversharps have so long been recognized as the standard of mechanical pencil values that little need be said about these new pencils, except their appearance. They are of standard Wahl quality and equipped with the famous perfected Eversharp mechanism.

In outward appearance they have changed. Instead of the embossed gold cap, the caps are made of the same material as the barrels and are straight and of the same diameter as the barrel. These new caps overcome the objections of many who think there is too much gold on pencils. They also make the pencil look slender, although the barrels are oversize.

Note the narrow gold bands that tastefully ornament the barrels and caps. Also note the roller clip—the same clip that has been so popular on Wahl Pens.

WAHL - EVERSHARP

EVERS HARP ENAMELED EMBLEM CAPS

The emblems shown above are beautifully enameled in full colors on the top of Eversharp pencil caps.

Orders for silver plated, sterling silver, and gold-filled Eversharps bearing caps with the emblem of any of the following organizations can be furnished from stock:

- | | | | |
|------------|----------|---------|--------|
| BLUE LODGE | K. OF C. | ELK | ROTARY |
| SHRINE | M. W. A. | KIWANIS | |

Complete information regarding special emblem caps for other organizations, schools, or with trade-marks, furnished upon request.

RED TOP EVERSHARP THIN LEADS

Red Top Eversharp Leads are made of the finest grades of domestic and imported graphites, clays and waxes. They are made in our own complete plant—strong, smooth-writing, and uniform year after year both as to grade and color.

The diameter of Red Top Eversharp Leads is accurately maintained to fit the patented rifled tips of Eversharp pencils. For perfect writing satisfaction, only Eversharp Leads should be used.

Made in the following grades and colors (standard Eversharp thin diameter):

- | | | |
|-------------------------|---|----------------|
| Black
(Seven Grades) | } | 2B—Extra Soft |
| | | B—Soft |
| | | HB—Medium Soft |
| | | F—Firm |
| | | H—Medium Hard |
| | | 2H—Hard |
| | | 4H—Very Hard |

- | | | |
|-------------------------------|---|----------------------------|
| Colors
(Medium Grade Only) | } | Red |
| | | Blue |
| | | Green |
| | | Yellow |
| | | Purple Copying (Indelible) |

Eversharp Leads are packed in Red Top containers as follows:

18 sticks of black lead, any grade, in metal tube. 12 sticks of colored lead in metal tube of same color. List Price, 15 cents per tube, minimum order, 12 tubes of one grade or color.

144 sticks of lead of one grade or color in sliding cardboard box, for office use (illustrated at left). List Price, Black Lead 75 cents per box; Red, Blue, Green, Yellow and Purple Copying (Indelible), \$1.50 per box. Minimum order 1 box.

EVERSHARP ERASERS

Every Eversharp eraser can be easily replaced when worn out with a new one. They are made of firm, smooth, red rubber, and have excellent erasing qualities. Below are shown the four sizes and styles of Eversharp erasers, and a brief explanation to indicate with which Eversharp pencils they are used. When ordering extra erasers be sure to specify the styles wanted.

Packed 6 in a box, except the SJ and LJ, which are 4 in a box. List Price 10 cents per box.

REG—Mounted eraser for use with all regular diameter precious-metal, rubber-barrel Eversharps, enameled-barrel pencils with a double magazine and the new Oversize models with straight caps.

BM—Mounted eraser for use with bakelite-barrel Eversharps having the eraser shell open at both ends. Also used with the enameled barrel pencils.

SJ—Short, mounted Jumbo eraser for use with \$3.00 and \$3.50 oversize Eversharps having a metal cap to conceal eraser.

LJ—Long, mounted Jumbo eraser for use with \$1.00 oversize Eversharps.

RED TOP EVERSHARP THICK WRITING LEADS

A new departure in lead making is marked by the addition of these medium-thick writing leads for use in Eversharp pencils. They are made especially for those who like to write with a heavy line, and who prefer a lead that can be used for checking and manifolding, as well as for continuous writing purposes. They are .075 of an inch in diameter, as compared with the .046 of an inch in diameter of the standard thin leads.

Only the finest materials are used in the manufacture of these leads. They are carefully calibrated to a constant diameter, and are of the same high quality in strength, smoothness, and uniformity of grade and color as the regular line of thin diameter Eversharp leads.

Made in the following grades and colors:

BLACK
(Graphite)
Medium
Soft

COLORS

(Medium Grade only)

- Red
- Blue
- Green
- Yellow
- Purple Copying (Indelible)

Packed eight sticks of one grade or color in Red Top metal tube. For easy identification, tubes correspond in color with the leads. List price 15 cents per tube. Minimum order twelve tubes of one grade or color, packed in carton.

EVERSHARP CHECKING LEADS

Eversharp Checking Leads are made for use in the Eversharp Checking and "Executive" pencils. These leads are .120 of an inch in diameter, and are especially adapted to heavy checking work, or marking on rough surfaces.

Eversharp Checking Leads are furnished in two grades: No. 1 (medium soft), and No. 2 (extra soft). The No. 2 grade writes well on glass, china, and other smooth or glazed surfaces. Both grades are made in the following colors:

Red
Blue
Green

Yellow
Black

Purple copying (indelible) checking leads, which write black and copy purple, can be furnished in the No. 1 grade (medium soft) only. Eversharp Checking Leads are packed six of one grade or color in cardboard box as shown above.

One box of checking leads included free with each Checking or "Executive" pencil. Black checking leads are always furnished unless otherwise ordered.

List Price 15 cents. Minimum order, 6 boxes of assorted grades and colors.

**EVERSHARP RED TOP
LEAD ASSORTMENT
No. 100**

Large size assortment. Contents:
12 Tubes each, grades 2B, B, HB,

Blue, Green, Yellow and Purple
.075 diameter Lead. Also 4 boxes
each Regular, LJ, BM, and SJ
Erasers.

Display stand shown at right fur-
nished with this assortment.

List Price \$32.65.

EVERSHARP LEAD COUNTER DISPLAY ASSORTMENTS

Increased sales of Eversharp Leads follow wherever they are displayed in these handsome counter display stands. The stands are a constant reminder to your customers, and serve as an invitation to them to reload their Eversharps. Every store can profit by the use of one or more of these busy silent salesman placed in prominent locations.

Eversharp Lead counter display stands are very substantially built, beautifully colored, and will remain attractive for years. They can be refilled easily when the assortment of leads needs replenishing.

These lead stands are made in two sizes, and are furnished only with standard assortments of Eversharp Leads as listed opposite each stand.

**EVERSHARP RED TOP LEAD
ASSORTMENT No. 10**

Small assortment. Contents:

12 Tubes each, grades HB, F, B, and
2B Lead; and 6 tubes each Purple, Red,
Blue, and Green Lead. Also 3 boxes
each Regular, LJ, BM, and SJ Erasers.

Display stand shown at right furnished
with this assortment.

List Price \$12.00.

12 tubes each, grades 2B, B, HB, and
F Lead; 6 boxes each Regular, LJ, BM,
and SJ Erasers.

Display stand shown at right furnished
with this assortment.

List Price \$9.60.

EVERSHARP UTILITY UNIT

THE Eversharp Utility Unit is an attractive package originated and designed to provide a greater number of people with Eversharp pencils for use in offices, schools and homes.

The Unit is made up of—

1 special enameled Eversharp, value	\$.50
6 tubes Eversharp Red Top Lead (18 sticks in tube, total 108 sticks), value90
6 Eversharp Erasers, value10
1 instruction sheet	
Total value	<u>\$1.50</u>
List price for complete unit	\$1.00

The list price of \$1.00 for this package gives an unusual purchase, as the six tubes of Red Top Lead and six erasers alone are worth the price of the Unit, making the genuine 50c Eversharp included free.

This self-contained unit is enclosed in the neat and inviting package illustrated above in actual size. Just large enough to hold the pencil, leads and erasers. A permanent, strong box, which can be used to store the extra leads and erasers as long as they last.

This offer of free Eversharp pencils has a fine appeal to every office—large or small—and therein lies your opportunity to sell Utility Units by the dozen or by the gross. Many offices are now furnishing refill leads to their employes—here is a fine way to secure the pencil as well and do away with the annoyance and high cost of wooden pencils.

Most suitable is this Utility Unit for the student—it is a perfect piece of equipment for his requirements. Every student, whether in grade school, high school, or college, can easily pay for a Utility Unit out of the savings in wooden pencils in a very short time. With one of these Units he will have a genuine Eversharp, with years of service ahead of it, plus a year's supply of refill leads.

You can buy Red Top Leads in the Utility Unit in any one of the seven standard degrees of hardness. Only one grade of lead is packed in each individual unit, but cartons of a dozen units may be assorted if you prefer—(B or HB is the usual choice for general work, and HB will be shipped on orders not clearly specifying grade). The Eversharp pencils are also provided with clip or without clip as preferred.

Each Unit is packed in individual box—12 boxes to counter display carton.

List Price \$12.00 per dozen units. Minimum order 12 boxes (assorted grades if desired).

THE WAHL WELL

The new and improved way to fill fountain pens

The Wahl Well is the first satisfactory device ever offered for filling modern fountain pens without soiling the hands. It is the result of many months of work to develop a convenient fountain-pen filling device which would be easy to operate, preserve the quality of the ink, avoid sedimentation and evaporation, withdraw all the ink without tipping, and prevent pen point from coming in contact with the hard glass surface. It entirely eliminates the messiness which has always accompanied the filling of a fountain pen.

The Wahl Well holds six ounces of the best quality permanent blue-black fountain pen ink that it is possible to manufacture. It is simple to operate, and makes the filling of pens easier and more pleasant. The pen barrel is not immersed in the ink. Filling a pen in the old ink bottle was invariably a messy operation, and no one ever had a rag handy to dry the pen and fingers after performing the task.

One will find real satisfaction in filling a pen the Wahl Well way.

ADVANTAGES

1. **Keeps pen and fingers clean**—the ink is drawn up into the inside of the pen—no ink is deposited on outside of barrel. The simplicity and ease in operating the Wahl Well to fill fountain pens this clean, neat way quickly wins the prospect to this new method and device.
2. **Protects pen point**—prevents point of pen touching hard glass bottom of bottle. This is a boon to the fountain pen and the satisfactory service required of it in use. Frequently the pen point is bent or forced out of proper position by stubbing it on the glass bottom in filling in the ordinary open-mouth ink bottle. This cannot occur in the Wahl Well.
3. **Prevents waste**—all ink can be withdrawn without tipping bottle. The patented stopper, with the rubber tube reaching down to the very bottom of the well, forms a hermetical seal, so that even though the cap is left off the bottle the ink will not spill if the bottle is tipped over.
4. **Keeps ink clean and in good condition**—stopper prevents dust and dirt getting into ink. No matter how long the bottle is in the desk, due to the patented stopper the ink is always clean. Evaporation cannot take place in the Wahl Well, and there is never any thick or dirty ink to fill up and clog the feed channels of your pen. With no thick and gummy ink to choke your pen, it is necessary to wash the pen with water much less frequently—and also good, clean ink insures greater length of life for the rubber ink sac of your pen.

Every person who has a desk set or an ordinary fountain pen should have a Wahl Well in his desk drawer, as it is the easiest and most convenient way to fill a fountain pen. Experience has shown that once a person has used the Wahl Well and become accustomed to its many conveniences, he will never go back to the ordinary ink bottle.

This unusual and attractive shaped bottle is further identified by a red cap.

No. List Price Tel. Word
 NK1 \$0.50 ea. SKINP 1 Wahl Well containing
 6 oz. Blue-Black Ink.

6.00 dz.

Minimum order is one dozen bottles.

Each bottle is packed in a neat blue cardboard box with a red top. Twelve Wahl Wells are packed in a case.

WAHL WELL Carton

How the WAHL WELL Operates

With filling lever open, push the pen down into the rubber stopper snugly until the lower part of the barrel makes an air-tight fit, as demonstrated in illustration.

When the filling lever is released, the suction of the ink sac immediately draws the ink up through the rubber tube that extends to the lowest part of the bottle into the reservoir into which the pen point has been placed, and the ink is sucked on up into the barrel of the pen. After holding the pen in the stopper for ten seconds to allow it to draw a full charge of ink, it is removed and is ready to write instantly. There is no ink on the lower barrel section which must be wiped off, as it has not been in the ink.

FITTING A PEN TO THE USER'S HAND

THE most important factor in the sale of a fountain pen is giving the customer a pen that suits his style of handwriting. By spending a little more time on this one feature at the time of sale, at least one-half of all so-called fountain pen troubles could be eliminated. Frequently a customer will complain of a scratchy nib, or of one in which the ink flow is too slow or too fast, when the real difficulty is that the pen is not suited to that person's style of writing.

On more than any other one thing, fountain pen satisfaction depends upon the selection of the proper nib. A purchaser should be offered a fine, medium, broad, manifold, posting, oblique, stub, half stub, or Signature nib, with an even ink flow, according to the writing style of the individual.

Every Wahl dealer and his salespeople should familiarize themselves with the Wahl Pen nib styles shown on this and the following page. The use of this knowledge at the time of the sale will make satisfied customers and create confidence in the store and in the pen purchased. If the exact nib wanted is not in your store, do not substitute, but write to us, sending if possible, a steel pen that just suits the user, and we will match it with a Wahl Pen nib.

WAHL PEN NIBS

ON THESE two pages are shown the many styles and sizes of Wahl 14K solid gold nibs. Among them are nibs to suit every style of handwriting. Wahl Pen nibs are generous in size, length, and gold content, and are heavily tipped with the highest grade of osmiridium—the hardest metal known. Each nib is pointed, ground, and smoothed by master craftsmen, and carefully tested by highly skilled inspectors before being passed as satisfactory for use in Wahl Pens. It is our firm belief that these nibs are in every respect the most nearly perfect nibs that are manufactured.

FLEXIBLE NIBS
 Sizes 2 to 6

- FLEXIBLE FINE
- FLEXIBLE MEDIUM
- FLEXIBLE BROAD
- No. 0 MEDIUM

These nibs are long and flexible so as to yield under the slightest pressure and shade easily when desired. They are excellent for general use, and especially adapted to those who use little pressure, prefer shading, and desire a cushion effect of the nib. The fine, medium and broad models give the user a choice as to width of tip and consequent thickness of lines. The No. 0 is made with medium tip only.

SIGNATURE SEMI-FLEXIBLE NIBS
Sizes 2 to 6

SIGNATURE SEMI-FLEXIBLE FINE
SIGNATURE SEMI-FLEXIBLE MEDIUM
SIGNATURE SEMI-FLEXIBLE BROAD

The medium flexibility of these nibs, and their all-around writing qualities make them suitable to the average writer for correspondence and general use. They are distinctly Wahl creations, unduplicated by other manufacturers, and are adapted to more styles of handwriting than any other nib. They have a medium cushion effect and shade slightly under pressure. Offered in three models—fine, medium and broad—to suit the user's need.

MANIFOLD MEDIUM
MANIFOLD BROAD

These are long stiff nibs, indestructible and easy flowing. Due to very rigid construction they write a neat, unshaded line under light pressure and, at the same time, stand up under the heavy pressure in making carbon copies. For that reason they are well adapted for salesmen as well as stenographers, bookkeepers, posters, accountants and ledgermen. The latter generally use the No. 2 Manifold Fine, which is especially good for systems of short-hand requiring neat unshaded characters.

STUB NIBS
Sizes 2 to 6

STUB
HALF-STUB
OBLIQUE

The stub nib is short, broad, and more flexible than the Manifold. It is especially good for those who write back-handed or hold the pen between their index and middle finger. A bold and shaded character is obtained. Half-stub is less broad than the stub, and is otherwise similar. Oblique nib is ground off on either the right or left side of the tip so as to accommodate those who turn the pen on the side when writing. Specify right or left oblique when ordering.

HOW INDIVIDUAL EVERSHARPS AND WAHL PENS ARE PACKED

All regular size Eversharps listing from \$1.00 to \$3.00 are packed one pencil in an attractive white set-up box (see illustration below), or in a white folding box of similar appearance.

Checking and "Executive" pencils are packed individually in neat brown set-up boxes similar to the one illustrated at the left.

Enameled, and Bakelite-barrel pencils are packed one dozen of one color and style (or one dozen assorted in standard assortment) on counter display card, and loose in straw-board cartons for quantity sales. Dozens cannot be broken.

The new \$1.00 oversize pencils are packed on special counter display cards in lots of one dozen of one color, or one dozen in standard assortment, and loose in straw-board cartons for quantity sales.

Silver filled pens and all composition pens are packed one pen in a white set-up box, as shown at the right.

The miniature and midget miniature pencils are furnished in special gift boxes, shown below.

Gold filled and sterling Eversharps listing at \$3.00 and up (except solid gold) are enclosed in handsome satin-and-velvet lined gift boxes, as shown at the left. The pencil illustrated is Eversharp No. 14.

Gold-filled match thin pencils are packed one pencil in a special gift box with velvet pad.

Solid gold Eversharps are furnished in genuine leather, satin-and-velvet lined presentation boxes.

Gold filled and sterling Wahl Pens to retail at \$5.00 and up (except solid gold) are packed in beautiful satin-and-velvet lined gift boxes, as illustrated at the right. The Wahl Pen shown is No. X7132.

Miniature pens are packed in the same style gift box as at the right, but in a smaller size.

Wahl Pens of solid gold are shipped in genuine leather presentation boxes, lined with satin and velvet.

WAHL-EVERSHARP WRITING SETS

FOR PRACTICALLY every Eversharp pencil shown in this catalog, there is a Wahl Pen shown which matches in material and decorative design. What more welcome and complete a gift could be obtained for any occasion or what more useful and appropriate articles for personal use, than these perfect writing companions!

On this and the following page are illustrated the boxes in which Eversharp and Wahl Pen combination writing sets are packed.

Men's sets composed of a precious metal pencil and pen to retail at \$6.00 and up (except solid gold) are packed in attractive satin-and-velvet lined gift boxes as shown above. The set illustrated is Eversharp No. 14 and Wahl Pen No. 646A.

Men's precious-metal combination writing sets listing at less than \$6.00 are packed in gift boxes similar to the one shown above, but without the satin-lined top.

Ladies' sets composed of a precious metal pencil and pen to retail at \$6.00 and up (except solid gold) are packed in satin-and-velvet lined gift boxes as shown below. The set in the illustration is Eversharp No. X71SW and Wahl Pen No. X7132.

Ladies' precious-metal combination writing sets listing at less than \$6.00 are packed in gift boxes similar to the one below, but without the satin-lined top.

Combination sets composed of a midget miniature Eversharp and a miniature Wahl Pen are furnished in satin-and-velvet lined gift boxes similar to the one shown below, but in a smaller size.

WAHL-EVERS HARP WRITING SETS

SETS MADE up of pencils and pens with hard rubber and composition barrels are packed in handsome gift boxes as shown above. The set illustrated is Oversize Eversharp No. K40RD and Wahl Pen No. 747RC.

Ladies' sets of hard rubber barrel pencils and pens are packed in the same style of gift box as above, except smaller in size.

To those desiring to present a gift of unusual elegance, we suggest a solid gold Wahl-Eversharp writing set, consisting of a solid gold Eversharp and a solid gold Wahl Pen to match. These sets are encased in beautiful white presentation boxes as illustrated below, lined with satin.

The ladies' solid gold set shown below is Eversharp No. 517BSW and Wahl Pen No. 3217BW. Men's solid gold sets are packed in the same style white satin lined presentation boxes.

For a group gift it would be difficult to find a more unique or more highly prized article than a Wahl-Eversharp writing set in either yellow or green solid gold.

SIMPLE CARE OF FOUNTAIN PENS INSURES PERFECT SERVICE

TO MANY PEOPLE, the care of a fountain pen involves only refilling with ink when necessary. But due to the action of the various inks used, and to the manner in which the pens are carried, used and misused, they occasionally get out of order.

By following a few simple points in the care of fountain pens, as explained below, every user of a Wahl Pen will be assured a perfect writing pen, free from the common faults that many have regarded as necessary evils. Wahl dealers will find this information of particular value in selling Wahl Pens, and in keeping their customers satisfied with the pens after they are sold.

RE-FILLING A WAHL PEN

Only good, clean bottled fountain pen ink, free from dust, dirt, and other foreign matter, should be used to fill a Wahl Pen. Hold pen in perpendicular position (with the point down) and raise the lever on side of barrel. Then completely submerge gold pen point and lower end of point section in ink. While in this position lower lever to its normal position, allowing point and point section to remain submerged in ink for about ten seconds to allow the rubber sac to draw in a full charge of ink. In the case of a new pen, repeat this lever movement to draw in and expel ink several times in order to moisten thoroughly the ink channel in the comb feed. Now, still holding pen with point down, wipe off surplus ink from pen and feed, and pen is ready for use.

Unless the gold pen and end of point section are completely submerged in ink and left in long enough to allow the sac to fill with ink, air bubbles will be drawn into the sac and the pen will be only partly filled. These air bubbles first retard the flow of ink, and afterwards, as the air rushes to the top of the ink sac, have a tendency to force out the ink, causing the pen to flood or drop ink.

The new Wahl Well, described in this catalog, provides the better modern improved way to fill the Wahl Pen and all other self-filling fountain pens.

Every salesperson should satisfy himself that each purchaser understands the proper method of filling a Wahl Pen.

CLEANING A WAHL PEN

More pens go to repair stations on account of being dirty or clogged than for any other reason. Every purchaser of a fountain pen should be told the importance of cleaning his pen at regular intervals. To clean a Wahl Pen, repeat the filling operation several times as outlined above, using cold water instead of ink. If pen is clogged, use a solution of one part ammonia to three parts water in order to dissolve the dried ink. Then remove dried ink from outside of pen and feed with a soft brush. By filling with and expelling the water, or water and ammonia solution, several times, the feed channel will be cleaned. Repeat this operation in clean water to get the ammonia

solution out of the pen. Then shake pen well in order to expel all the water, and the pen is ready for filling as directed above. **DO NOT USE HOT WATER**, as this will soften the hard rubber parts.

The inside of the cap should be cleaned frequently with a piece of soft cloth or tissue paper and the air-holes in side of cap should be cleaned with an ordinary pin.

If pen is very badly clogged with dried, or poor ink, and cannot be thoroughly cleaned as above, it should be placed in the hands of a competent fountain pen repair man at a regular pen service station.

CARE OF STOCK

Do not put rubber bands around silver pens or pencils. The sulphur in the rubber will cause the silver to tarnish rapidly, and within a very short time will actually eat into the silver, damaging the surface beyond repair. Pens and pencils with black rubber

barrels should not be exposed to strong light or to the direct rays of the sun. They will fade, and thus their salability will be impaired. When faded, it is impossible to restore the original color and finish to these pens and pencils.

WAHL-EVERSHARP REPAIR SERVICE

Besides complete repair departments maintained at the factory and at each of our branch offices, for the benefit of all Wahl Pen and Eversharp dealers and users, Wahl-Eversharp service stations have been established in practically all the larger cities of the country.

Expert pen and pencil repairing at the same prices as charged by us, can be obtained promptly from any of these stations. We shall be glad to send you the name of your nearest Wahl-Eversharp Service Station.
